JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

XXII. *Journal of the Weather at* Montreal. *By Mr.* Barr. *Communicated by* Richard Saunders, *M. D. F. R. S.*

TO SIR JOHN PRINGLE, BART. P. R. S.

Brighton, 4th Sept. 1777.

SIR,

Read Feb. 26, 1778.

SOME days ago I received the incloſed Journal of the weather, kept by Mr. BARR, for a few of the winter months, at Montreal, with a deſire to put it into your hands. I underſtand that the winter was thought particularly mild. The thermometer was FAHRENHEIT'S graduated 50 degrees below 0. I obſerve that the wind never blew from the north; nor do I know that it ever blew from that quarter while I was in America.

I have the honour to be, &c.

R. SAUNDERS.

FOR DECEMBER, 1776.

Days of the Month.	Thermometer. Morning	Thermometer. Evening	Snow	Wind	Remarks.
	°	°	Inches		
14	+10	− 4		NE	Clear.
